Green = Fully Charged, Blue = Half Charged, Red = Low Power

PRÜF CULTIVAR

BATTERIES AND CO₂ OIL CARTRIDGES

PRÜF CARTRIDGE

FEATURES

- High quality stainless steel and glass construction
- Ceramic mouthpiece
- Ceramic vertical coil for best flavor and consistent performance
- Distillate CO₂ oil with reintroduced same strain/batch terpenes

INSTRUCTIONS

- Store cartridge upright.
- Do not over-tighten when screwing into battery.
- Use with Prüf Cultivar battery to ensure best performance.
- Start with the lowest heat setting on your battery, gradually increasing heat as needed to reach your optimal setting.
- Room temperature is ideal for storage and use of cartridges. Avoid extended exposure to extreme heat or cold.
- If clogging occurs, use the pre-heat mode (rapidly press button twice and wait for lights to cycle while it heats) then try again to see if clog has cleared.
- If cartridge fails to heat, it may be due to an interrupted connection with the battery, remove cartridge and clean connection points on both the battery and cartridge.

Batteries are compatible with the majority of 510-thread cartridges on the market.

Prüf Cultivar batteries and cartridges come with a warranty against defects. If the product fails, please bring the product and receipt to the dispensary from which it was purchased within seven days of purchase for a replacement at no extra cost.
